

Manage your truck inventory and sales online!

J Systems Inc., a Houston based technical support and development corporation, introduces iTrucks, the only internet based truck inventory and sales management system.

Unlike other systems, iTrucks gives you, the national truck distributor, complete visibility and control of your inventory thru a simple to use web interface. iTrucks has been developed specifically for the used truck sales distributor and J Systems has worked very closely with several nationally recognized used truck distributors in the Houston area to bring you a tool that will promote your sales!

iTrucks Highlights

- Home page customized for your company, including the addresses and maps to all your locations along with contact information.
- Multiple inventory listing options so you can see your inventory almost any way you like no matter where it is at.
- Multiple sales tracking reports to analyze sales performance.
- Advanced "Truck Search" options including ability to link to other iTrucks customers to locate trucks not in your Inventory.
- Online financing application customized to your needs.
- Online financing calculator to help your customers understand their needs.
- Generate reports of who's visiting your iTrucks website for lead generation, sales analysis or other follow-up.
- Export critical data for use by your financial department.
- Accessible online by all web browsers including many mobile devices.
- Enhanced security features to protect your data and information
- Easy to use Manager's web page for loading and modifying data
- 24 hour technical support
- Runs all popular web servers, J Systems can host your web site if you don't already have one.
